

## **ROBOTECH PRESS RELEASE**

**Hoboken , New Jersey — October 13, 2015 —** We are pleased to announce that Robotech CAD Solutions is partnering with CivilTraining, LLC to support our Civil and Infrastructure Autodesk solutions. Our organization strives daily to improve service quality that we provide to our clients. Robotech's Autodesk CAD-BIM software solutions together with CivilTraining, LLC's industry expertise and training services add value to our Civil Infrastructure technology solutions and sustain our commitment to our customers' success with their Autodesk Civil Infrastructure products. Our partnership provides Civil Infrastructure firms with Autodesk software and knowledge to increase their projects' efficiency and profitability.

Robotech CAD Solutions, Inc. has been providing Autodesk CAD and BIM technology software and services for over two decades. Robotech's comprehensive solutions include needs analysis, specifications development, system deployment, software configuration, database integration, data development, best-practice-training and support maintenance programs. From initial deployment to long-term maintenance, Robotech's expert team will be with our customers as their technology partner and support center for their Autodesk systems.

CivilTraining, LLC provides training, implementation and consulting services to the Civil Engineering, Surveying and GIS/Mapping communities. Their mission is to promote knowledge and best practices in the industries served, and to increase clients' profitability margin by helping professionals become more productive through technology. CivilTraining, LLC's clients range from sole proprietors to ENR Top 100 firms, as well as local, state and federal government agencies. Commercial clients include all aspects of Civil Engineering and Surveying, and a wide assortment of related firms, including Real Estate Developers, Landscape Architects, Theme Parks and Environmental Consultants.
