

Healthcare Facilities Management

Robotech CAD Solutions offers Integrated Workspace Management System (IWMS) implementation services specific to healthcare facilities to increase efficiency and profitability of the FM operation. Our supported intranet solutions include ARCHIBUS, AutoCAD and BIM/Revit systems for Space Management, occupancy and move management, asset tracking, lease management and building maintenance solutions. Our implementation services for healthcare include implementation of mobile devices for building survey and run-anywhere site maintenance. Implementations include system administration and data development for delivering an integrated Web Central IWMS for Healthcare facilities management.

Space - CAD & BIM - Occupancy - Moves - Work Orders - PM - Mobile
